

# Data Maturity Assessment Template 2026

Enterprise Data Solutions | Data Maturity Assessment Framework

Version: 2.0

Last Updated: January 2026

Type: Assessment Template

Website: [EnterpriseDataSolutions.co.nz](https://EnterpriseDataSolutions.co.nz)  
Email: [Contact@EnterpriseDataSolutions.co.nz](mailto:Contact@EnterpriseDataSolutions.co.nz)

### Table of Contents

- 1. Introduction
- 2. How to Use This Template
- 3. Maturity Level Definitions
- 4. Assessment Dimensions
- 5. Scoring Summary
- 6. Gap Analysis
- 7. Action Planning
- 8. Roadmap Template
- 9. Appendix

### Assessment Dimensions

- D1: Strategy & Governance
- D2: Quality & Integration
- D3: Infrastructure & Architecture
- D4: Analytics & BI
- D5: Culture & Literacy
- D6: Security & Compliance

### Maturity Levels

- Level 1: Initial / Ad Hoc
- Level 2: Developing / Repeatable
- Level 3: Defined / Standardized
- Level 4: Managed / Measured
- Level 5: Optimized / Leading

## 1. Introduction

### Purpose

This Data Maturity Assessment Template is designed to help organizations evaluate their current data capabilities across six critical dimensions. By completing this assessment, you will:

- **Understand** your organization's current data maturity level
- **Identify** gaps and areas for improvement
- **Prioritize** initiatives based on impact and effort
- **Create** a roadmap for advancing your data capabilities
- **Benchmark** progress over time

### Who Should Complete This Assessment?

This assessment should be completed collaboratively by stakeholders from:

- Data & Analytics teams
- IT / Technology leadership
- Business unit leaders
- Compliance / Legal teams
- Executive sponsors

### Assessment Frequency

We recommend conducting this assessment:

- **Initially:** To establish a baseline
- **Quarterly:** For tracking rapid transformation initiatives
- **Annually:** For strategic planning and budgeting

## 2. How to Use This Template

### 1 Preparation (1-2 hours)

- Gather documentation
- Identify stakeholders
- Schedule workshop

### 2 Assessment (2-4 hours)

- Review each dimension
- Rate criteria (1-5)
- Document evidence

### 3 Analysis (1-2 hours)

- Complete scoring
- Identify top gaps
- Prioritize initiatives

### 4 Action Planning (2-4 hours)

- Review recommendations
- Select initiatives
- Create roadmap

### 3. Maturity Level Definitions

1

**Initial / Ad Hoc**

No formal processes. Data activities are reactive and inconsistent. Heavy reliance on manual ef...

2

**Developing / Repeatable**

Basic processes exist but are not standardized. Some documentation. Departmental silos common. ...

3

**Defined / Standardized**

Formal processes documented and followed. Organization-wide standards emerging. Dedicated data ...

4

**Managed / Measured**

Processes are measured and controlled. Metrics-driven decisions. Proactive data management. Cro...

5

**Optimized / Leading**

Continuous improvement culture. Industry-leading practices. Data is a strategic asset driving c...

## 4. Assessment Dimensions

1

### Dimension 1: Data Strategy & Governance

Evaluates the organization's strategic approach to data, including executive sponsorship, governance frameworks, policies, and alignment with business objectives.

#### 1.1 Executive Sponsorship & Vision

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Leadership Commitment	No executive sponsor for data initiatives	Informal sponsor, limited engagement	Formal executive sponsor identified	C-level champion actively engaged	CEO/Board treats data as strategic priority
Data Vision & Strategy	No documented data strategy	Informal or departmental strategies	Enterprise data strategy documented	Strategy aligned with business goals, reviewed annually	Data strategy drives business strategy
Investment & Budget	No dedicated data budget	Ad hoc funding for data projects	Annual data budget allocated	Multi-year investment roadmap	Strategic portfolio management for data

#### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Leadership Commitment	_____	
Data Vision & Strategy	_____	
Investment & Budget	_____	
Sub-Total	_____ / 15	

#### 1.2 Data Governance Framework

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Governance Structure	No governance structure	Informal roles, unclear accountability	Governance council established	Federated governance with clear RACI	Self-service governance with automation
Policies & Standards	No documented policies	Basic policies, inconsistent application	Comprehensive policies documented	Policies enforced with monitoring	Adaptive policies, continuous improvement
Data Stewardship	No data stewards	Ad hoc stewardship	Formal stewards in some domains	Stewards for all critical domains	Stewardship embedded in all roles

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Governance Structure	_____	
Policies & Standards	_____	
Data Stewardship	_____	
Sub-Total	_____ / 15	

## 1.3 Data Ownership & Accountability

 Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Data Ownership	No clear ownership	IT owns all data by default	Business data owners assigned	Clear ownership with accountability	Data ownership in performance metrics
RACI Matrix	No RACI defined	Informal responsibilities	RACI documented for key domains	RACI enforced and reviewed	Dynamic RACI with workflow automation
Decision Rights	Ad hoc decisions	IT makes data decisions	Joint IT-Business decision making	Business-led with IT enablement	Data-driven decision framework

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Data Ownership	_____	
RACI Matrix	_____	
Decision Rights	_____	
Sub-Total	_____ / 15	

Dimension 1 Total: \_\_\_\_ / 45

2

Dimension 2: Data Quality & Integration

Assesses the organization's ability to ensure data is accurate, complete, consistent, and integrated across systems.

2.1 Data Quality Management

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Quality Standards	No quality standards defined	Basic standards for some data	Quality dimensions defined (accuracy, completeness, etc.)	Standards with SLAs per domain	Automated quality contracts
Quality Measurement	No measurement	Manual spot checks	Regular quality assessments	Real-time quality dashboards	Predictive quality monitoring
Quality Remediation	Reactive fixes only	Ad hoc remediation processes	Defined remediation workflows	Root cause analysis standard	Automated remediation with ML

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Quality Standards	_____	
Quality Measurement	_____	
Quality Remediation	_____	
Sub-Total	_____ / 15	

2.2 Data Profiling & Monitoring

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Data Profiling	No profiling capability	Manual profiling on request	Regular profiling for key datasets	Automated profiling at ingestion	Continuous profiling with anomaly detection
Quality Monitoring	No monitoring	Periodic manual reviews	Scheduled automated checks	Real-time monitoring with alerts	Self-healing data pipelines
Quality Reporting	No quality reports	Ad hoc reports on request	Regular quality scorecards	Executive quality dashboards	Quality integrated into business KPIs

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Data Profiling	_____	
Quality Monitoring	_____	
Quality Reporting	_____	
Sub-Total	_____ / 15	

## 2.3 Data Integration & Master Data

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Integration Patterns	Point-to-point integrations	ETL batch processing	Enterprise integration platform	Real-time + batch hybrid	Event-driven architecture
Master Data Management	No MDM program	MDM for some domains	Enterprise MDM platform	Golden records with matching/merging	MDM-as-a-service with AI
Data Lineage	No lineage tracking	Manual documentation	Tool-based lineage for some systems	End-to-end automated lineage	Business + technical lineage integrated

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Integration Patterns	_____	
Master Data Management	_____	
Data Lineage	_____	
Sub-Total	_____ / 15	

Dimension 2 Total: \_\_\_\_ / 45

3

Dimension 3: Data Infrastructure & Architecture

Evaluates the technical foundation supporting data storage, processing, and delivery capabilities.

3.1 Data Platform & Storage

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Platform Architecture	Fragmented, legacy systems	Departmental data marts	Enterprise data warehouse	Modern data lakehouse	Multi-cloud data mesh
Storage Strategy	No strategy, organic growth	Basic storage tiers	Tiered storage with lifecycle	Intelligent storage optimization	Cost-optimized, auto-scaling
Scalability	Cannot scale, fixed capacity	Manual scaling, high effort	Scalable with planning	Auto-scaling for most workloads	Infinite scale, serverless

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Platform Architecture	____	
Storage Strategy	____	
Scalability	____	
Sub-Total	____ / 15	

3.2 Data Processing & Pipelines

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Pipeline Architecture	Manual data movement	Scheduled batch jobs	Orchestrated pipelines	Real-time streaming + batch	Unified batch-streaming platform

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Data Transformation	Manual transformations	Scripted transformations	dbt/transformation layer	Version-controlled, tested transforms	Self-documenting transformations
Pipeline Operations	No monitoring, breaks often	Basic alerting	Observability platform	SLA-based monitoring	AIOps for pipeline management

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Pipeline Architecture	_____	
Data Transformation	_____	
Pipeline Operations	_____	
Sub-Total	_____ / 15	

## 3.3 Data Catalog & Metadata

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Data Catalog	No catalog	Spreadsheet-based inventory	Basic data catalog tool	Enterprise catalog with search	AI-powered discovery & recommendations
Business Glossary	No glossary	Informal definitions	Documented business terms	Glossary linked to technical metadata	Living glossary with data lineage
Metadata Management	No metadata standards	Manual metadata entry	Automated metadata extraction	Metadata-driven automation	Active metadata management

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Data Catalog	_____	
Business Glossary	_____	
Metadata Management	_____	
Sub-Total	_____ / 15	

**Dimension 3 Total:** \_\_\_\_ / 45

4

Dimension 4: Analytics & Business Intelligence

Measures the organization's ability to derive insights from data and support decision-making at all levels.

4.1 BI & Reporting Capabilities

Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Reporting Platform	Spreadsheet-based reporting	Multiple disconnected BI tools	Enterprise BI platform	Unified semantic layer	Embedded analytics everywhere
Self-Service Analytics	IT creates all reports	Limited self-service	Self-service for power users	Widespread self-service adoption	Citizen data scientists enabled
Report Quality	Inconsistent metrics	Standardized templates	Certified reports & dashboards	Governed self-service	Automated insight generation

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Reporting Platform	_____	
Self-Service Analytics	_____	
Report Quality	_____	
Sub-Total	_____ / 15	

4.2 Advanced Analytics & AI/ML

Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Analytics Maturity	Descriptive only	Some predictive analytics	Predictive models in production	Prescriptive analytics	AI-driven decisions at scale
ML Operations	No ML capability	Ad hoc model development	MLOps foundation	Enterprise ML platform	AutoML + continuous learning
AI Strategy	No AI initiatives	Experimental AI projects	AI roadmap defined	AI embedded in processes	AI-first organization

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Analytics Maturity	_____	
ML Operations	_____	
AI Strategy	_____	
Sub-Total	_____ / 15	

4.3 Decision Support & Action

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Decision Processes	Gut-feel decisions	Data consulted sometimes	Data informs most decisions	Data-driven culture	Real-time decision automation
Insight to Action	Reports rarely acted upon	Quarterly business reviews	Monthly data-driven decisions	Weekly insight cycles	Real-time operational analytics
Business Impact Tracking	No impact measurement	Ad hoc ROI assessments	Regular value tracking	Analytics ROI dashboard	Value embedded in operations

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Decision Processes	_____	
Insight to Action	_____	
Business Impact Tracking	_____	
Sub-Total	_____ / 15	

Dimension 4 Total: \_\_\_\_ / 45

5

Dimension 5: Data Culture & Literacy

*Assesses the human factors including skills, training, and organizational culture around data.*

## 5.1 Data Skills & Training

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Skills Assessment	No skills inventory	Informal skill awareness	Skills matrix documented	Regular skills assessments	Dynamic skills marketplace
Training Programs	No formal training	Ad hoc training	Structured learning paths	Role-based data curriculum	Continuous learning culture
Career Development	No data career paths	Limited advancement options	Data roles defined	Data career ladders	Data roles across all functions

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Skills Assessment	_____	
Training Programs	_____	
Career Development	_____	
Sub-Total	_____ / 15	

## 5.2 Data Literacy

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Basic Data Literacy	Minimal data understanding	Some teams data literate	Data literacy program exists	Organization-wide literacy	Data literacy in hiring criteria
Critical Thinking	Data taken at face value	Some questioning of data	Healthy skepticism encouraged	Evidence-based culture	Data debate is normal
Communication	Poor data storytelling	Basic charts and graphs	Effective visualizations	Compelling data narratives	Data storytelling is standard

### Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Basic Data Literacy	_____	
Critical Thinking	_____	

Criteria	Score (1-5)	Evidence / Notes
Communication	_____	
Sub-Total	_____ / 15	

5.3 Organizational Change Management

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Change Readiness	Resistant to change	Pockets of adoption	Change management processes	Data champions network	Data innovation culture
Collaboration	Siloed teams	Some cross-functional work	Regular collaboration forums	Embedded data partnerships	Data communities of practice
Innovation	No experimentation	Occasional pilots	Structured experimentation	Fail-fast culture	Continuous innovation loops

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Change Readiness	_____	
Collaboration	_____	
Innovation	_____	
Sub-Total	_____ / 15	

Dimension 5 Total: \_\_\_\_ / 45

6

Dimension 6: Data Security & Compliance

Evaluates the organization's approach to protecting data and meeting regulatory requirements.

6.1 Data Security

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Access Controls	Minimal access controls	Basic authentication	Role-based access (RBAC)	Attribute-based access (ABAC)	Zero-trust data security
Data Protection	No encryption	Encryption at rest	Encryption in transit + rest	End-to-end encryption	Privacy-preserving analytics
Threat Detection	No monitoring	Basic logging	Security monitoring	Real-time threat detection	AI-powered security ops

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Access Controls	_____	
Data Protection	_____	
Threat Detection	_____	
Sub-Total	_____ / 15	

6.2 Privacy & Compliance

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Privacy Program	No privacy program	Reactive compliance	Privacy framework implemented	Privacy by design	Privacy as competitive advantage
Regulatory Compliance	Non-compliant	Working toward compliance	Basic compliance achieved	Proactive compliance	Industry compliance leader
Data Classification	No classification	Ad hoc labeling	Classification scheme defined	Automated classification	Dynamic classification with DLP

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Privacy Program	_____	
Regulatory Compliance	_____	
Data Classification	_____	

Criteria	Score (1-5)	Evidence / Notes
Sub-Total	___ / 15	

6.3 Risk Management

■ Rate each criterion (1-5) according to the definitions provided above.

Criteria	Level 1	Level 2	Level 3	Level 4	Level 5
Risk Assessment	No data risk assessment	Annual risk review	Regular risk assessments	Continuous risk monitoring	Predictive risk analytics
Incident Response	No incident plan	Basic response procedures	Incident response playbooks	Automated incident response	Proactive threat hunting
Business Continuity	No DR for data	Basic backup procedures	DR plan documented & tested	Multi-region redundancy	Zero-RPO, near-zero RTO

Your Assessment:

Criteria	Score (1-5)	Evidence / Notes
Risk Assessment	___	
Incident Response	___	
Business Continuity	___	
Sub-Total	___ / 15	

Dimension 6 Total: \_\_\_ / 45

5. Scoring Summary

Dimension Scores

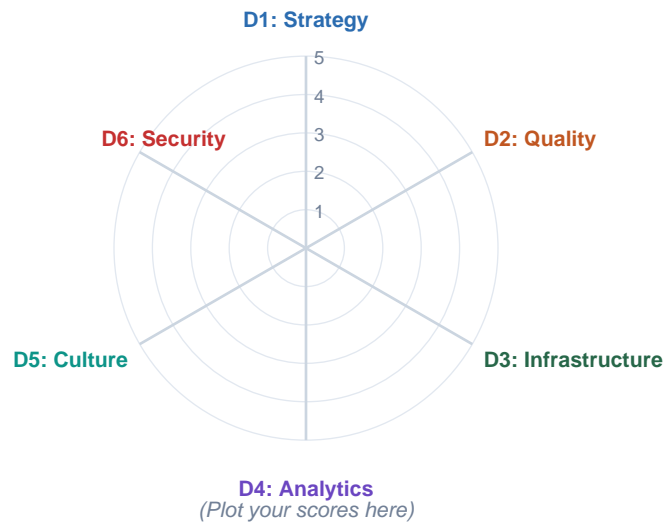

Dimension	Max Score	Your Score	Percentage	Level
1. Data Strategy & Governance	45	___	___%	___
2. Data Quality & Integration	45	___	___%	___
3. Data Infrastructure & Architecture	45	___	___%	___
4. Analytics & Business Intelligence	45	___	___%	___
5. Data Culture & Literacy	45	___	___%	___
6. Data Security & Compliance	45	___	___%	___
OVERALL TOTAL	270	___	___%	___

Score to Level Conversion

Percentage Range	Maturity Level
0% - 20%	Level 1: Initial / Ad Hoc
21% - 40%	Level 2: Developing / Repeatable
41% - 60%	Level 3: Defined / Standardized
61% - 80%	Level 4: Managed / Measured
81% - 100%	Level 5: Optimized / Leading

## Maturity Radar Visualization

Plot your dimension scores on the radar chart below:

## 6. Gap Analysis

### Identify Your Top Gaps

Based on your assessment scores, identify the top 5 gaps (lowest-scoring areas):

Rank	Dimension	Sub-Category	Criteria	Current	Target	Gap
1						
2						
3						
4						
5						

## Gap Prioritization Matrix

Prioritize gaps based on **Business Impact** (High/Medium/Low) and **Effort to Close** (High/Medium/Low):

	Low Effort	Medium Effort	High Effort
High Impact	QUICK WINS	MAJOR PROJECTS	STRATEGIC BETS
Medium Impact	FILL-INS	MODERATE PRIORITY	LONG-TERM
Low Impact	NICE TO HAVE	LOW PRIORITY	AVOID

## 7. Action Planning by Maturity Level

### Level 1: Initial/Ad Hoc — Focus on Foundations

**Secure Executive Sponsorship:** Identify senior champion, Present business case, Establish steering committee

**Document Current State:** Create data inventory, Map critical flows, Identify pain points

**Establish Basic Governance:** Define ownership, Create policies, Assign stewards

---

### Level 2: Developing/Repeatable — Build Structure

**Develop Data Strategy:** Document 2-3 year vision, Align with business, Create investment roadmap

**Formalize Governance:** Establish council, Define RACI, Implement processes

**Implement Quality Tools:** Select platform, Define thresholds, Create scorecards

---

### Level 3: Defined/Standardized — Scale & Optimize

**Implement Enterprise Platform:** Deploy lakehouse, Implement catalog, Enable metadata

**Enable Advanced Analytics:** Build ML/AI capabilities, Implement MLOps, Create CoE

**Scale Data Literacy:** Launch programs, Create learning paths, Build champions network

---

### Level 4: Managed/Measured — Lead & Innovate

**Implement Data Mesh/Fabric:** Domain ownership, Self-serve infrastructure, Federated governance

**Advance AI at Scale:** Enterprise AI platform, AutoML capabilities, Embed in processes

**Create Data Products:** Monetization opportunities, Internal marketplace, External offerings

---

### Level 5: Optimized/Leading — Transform & Lead

**Drive Industry Leadership:** Share best practices, Contribute to standards, Build thought leadership

**Pioneer Emerging Tech:** Cutting-edge experiments, AI pilots, Quantum exploration

**Maximize Data Value:** Optimize monetization, Ecosystem partnerships, Competitive moats

---

8. Roadmap Template

12-Month Data Maturity Roadmap

Phase 1: Foundation (Months 1-3)

Initiative	Owner	Start	End	Dependencies	Status
					Not Started
					Not Started

Phase 2: Build (Months 4-6)

Initiative	Owner	Start	End	Dependencies	Status
					Not Started
					Not Started

Phase 3: Scale (Months 7-9)

Initiative	Owner	Start	End	Dependencies	Status
					Not Started
					Not Started

Phase 4: Optimize (Months 10-12)

Initiative	Owner	Start	End	Dependencies	Status
					Not Started
					Not Started

Resource Planning

Role	Phase 1	Phase 2	Phase 3	Phase 4	Notes
Data Engineer					
Data Analyst					
Data Scientist					
Data Architect					
Governance Lead					
Project Manager					

Budget Estimate

Category	Phase 1	Phase 2	Phase 3	Phase 4	Total
Technology/Tools	\$	\$	\$	\$	\$
Personnel	\$	\$	\$	\$	\$
Training	\$	\$	\$	\$	\$
Consulting	\$	\$	\$	\$	\$
Infrastructure	\$	\$	\$	\$	\$
TOTAL	\$	\$	\$	\$	\$

## 9. Appendix

### A. Glossary of Terms

Term	Definition
ABAC	Attribute-Based Access Control - Access control based on user/resource attributes
AutoML	Automated Machine Learning - Tools that automate ML model development
Data Catalog	Inventory of data assets with metadata and searchability
Data Lakehouse	Architecture combining data lake and data warehouse capabilities
Data Lineage	Documentation of data's origins, movements, and transformations
Data Mesh	Decentralized data architecture with domain-oriented ownership
Data Steward	Person responsible for data quality within a domain
DLP	Data Loss Prevention - Tools to detect and prevent data breaches
dbt	Data Build Tool - Transformation tool for analytics engineering
ETL	Extract, Transform, Load - Traditional data integration pattern
ELT	Extract, Load, Transform - Modern data integration pattern
MDM	Master Data Management - Creating single source of truth
MLOps	Machine Learning Operations - Practices for ML model lifecycle
RACI	Responsible, Accountable, Consulted, Informed matrix
RBAC	Role-Based Access Control - Access control based on user roles
SLA	Service Level Agreement - Commitment to service standards

B. Assessment Facilitation Guide

Pre-Assessment Checklist:

- Send assessment to participants 1 week in advance
- Schedule 2-3 hour workshop
- Gather supporting documentation
- Prepare examples for each maturity level

During Assessment:

- Review maturity level definitions (15 min)
- Complete each dimension as a group (20-30 min each)
- Discuss and resolve scoring disagreements
- Document evidence and notes

Post-Assessment:

- Calculate all scores
- Identify top gaps
- Prioritize initiatives
- Schedule roadmap planning session

C. Industry Benchmark Data

Dimension	All Industries	Technology	Financial	Healthcare	Retail
Strategy & Governance	2.8	3.4	3.6	2.9	2.5
Quality & Integration	2.6	3.2	3.4	2.7	2.4
Infrastructure	2.9	3.7	3.5	2.8	2.6
Analytics & BI	2.7	3.5	3.3	2.6	2.8
Culture & Literacy	2.4	3.1	2.9	2.3	2.2
Security & Compliance	3.0	3.3	4.1	3.8	2.7
Overall Average	2.7	3.4	3.5	2.9	2.5

D. Version History

Version	Date	Author	Changes
1.0	Jan 2024	Enterprise Data Solutions	Initial release
1.5	Jun 2024	Enterprise Data Solutions	Added AI/ML criteria, updated benchmarks

Version	Date	Author	Changes
2.0	Jan 2026	Enterprise Data Solutions	Major update: radar chart, action planning, benchmarks

## About Enterprise Data Solutions

Enterprise Data Solutions helps organizations transform their data capabilities from strategic planning to implementation. Our services include:

- **Data Strategy Consulting** — Develop comprehensive data strategies aligned with business goals
- **Data Platform Implementation** — Build modern data infrastructure on cloud platforms
- **Analytics & AI** — Deploy advanced analytics and machine learning solutions
- **Data Governance** — Implement governance frameworks and data quality programs
